

Bellver Starter Checklist

Before you order: get these five things ready

By MTG (Musa The Giant), independent Bellver Card guide | Updated October 2026

1. Get ready

- ☐ A phone with an authenticator app (Google Authenticator, Authy or similar) for two-factor login.
- ☐ USDT or USDC to fund your wallet, or a credit card if you want to buy crypto inside the dashboard.
- ☐ About \$10 to \$20 of BNB (or TRX) for network gas fees. It is not the card payment.
- ☐ Pen and paper. You will write your private key down.
- ☐ Roughly 20 minutes without interruptions.

2. Register and secure your account

DO THIS FIRST

- ☐ Register with MTG's link: app.bellvercards.com?ref=mtg
- ☐ Switch on the authenticator app in Settings before you add any money.
- ☐ Open My Wallet, Settings, Account and security and set up your private key.
- ☐ Write the key down on paper and keep it somewhere private. Do not screenshot it or store it online.
- ☐ Nobody legitimate will ever ask you for your private key. If someone does, it is a scam.

3. Fund your wallet

- ☐ Open My Wallet, then Deposit.
- ☐ Best option: send USDT or USDC on BNB Smart Chain from any wallet or exchange. It is fast and low cost.
- ☐ Send a small test amount first and wait until it lands, then send the rest.
- ☐ Check the network and the address twice. Crypto sent to a wrong address cannot be recovered.

4. Choose your card

- ☐ Basic \$99: daily limit \$1,000, \$500 per payment. No monthly rewards.
- ☐ Premium \$270: daily \$10,000, \$5,000 per payment. Monthly rewards up to 12 levels.
- ☐ Business \$490: daily \$50,000, \$10,000 per payment. Monthly rewards up to 15 levels.
- ☐ Gold \$990: daily \$250,000, \$20,000 per payment. Monthly rewards up to 20 levels.
- ☐ Virtual card (Mastercard): ready at once, no shipping. Physical card (Visa): works for ATM cash, shipping \$85 Europe, \$149 worldwide. For a physical card, give a full address and a valid local mobile number, or it cannot be delivered.
- ☐ You can upgrade later and pay only the difference. Special Edition: +\$370 when you buy, \$470 to upgrade a regular card.

Independent guide by MTG, not the official Bellver website. MTG may earn a commission if you order through his link, at no extra cost to you. Prices, fees and rules come from Bellver's official documents (version 08/2026) and its October 2026 news, and can change. Rewards are never guaranteed. This is not financial, tax or legal advice.

Bellver Starter Checklist

After you order: use it well and know the rules

By MTG (Musa The Giant), independent Bellver Card guide | Updated October 2026

5. Load it and pay

- ☐ Move the amount you want to spend from your wallet to your card. It arrives in seconds.
- ☐ Add the card to Apple Pay or Google Pay, or link an NFC ring or wristband.
- ☐ Keep most of your money in your own wallet and move only what you need.
- ☐ The card account is in US dollars. You can pay in any local currency.

6. Know the fees before you spend

- ☐ Top-up fee: 3.9% when you load the card (cut from 4.95% in October 2026).
- ☐ Transaction fee: 1.75% per transaction.
- ☐ ATM withdrawals: 2%.
- ☐ The official price list shows no monthly or annual card fee. Check the latest price list at any time.

7. If you want to share it and earn

KNOW THE RULES

- ☐ Rewards are optional. You can simply use the card and never refer anyone.
- ☐ Direct commissions: \$10 Basic, \$100 Premium, \$200 Business, \$400 Gold. With Special Edition: \$150, \$300 and \$500 for Premium, Business and Gold.
- ☐ Everyone starts as a Member. Your first star, and monthly rewards, need your own card at Premium or higher plus two new personal referrals who each buy Premium or higher. Basic earns direct commissions only.
- ☐ Order your own card first. You get your matrix position when your card appears.
- ☐ To receive monthly rewards, load at least \$100 a month onto your own card.
- ☐ Miss the \$100 minimum three months in a row and you lose your matrix position for good.
- ☐ Commissions this month move to Earnings available on the 15th. Withdrawals start from \$100.

8. Stay safe

- ☐ Never share your private key, your password or your authenticator codes.
- ☐ Only use the official address app.bellvercards.com. Bellver never emails links to its login page. Use a strong password plus 2FA or a passkey.
- ☐ Only put in what you can afford. Crypto prices and rules change, and rewards are never guaranteed.
